

The Research and Independent NGOs (RINGOs) present a series of side-events:

The RINGO Research Updates

How up to date are you? Have you kept up with the latest studies on what is happening with Greenland's ice? Have you thought about the latest scenarios used in climate modeling? How about what's going on in adaptation, and what is still needed? Are you aware of the increasing debate over geo-engineering? How far can renewables take us? Answers to these questions from leading researchers in this RINGO series.

From 13:00
to 15:00h!

**Monday Nov 2: Science
and scenarios**

**Wednesday Nov 4:
Impacts and
adaptation**

**Thursday Nov 5:
Mitigation
technologies**

Friday Nov 6: Mitigation policy

Speakers: Bill Hare (PIK), Detlef van Vuuren (PBL), Saleemul Huq (IIED), Ian Burton, Lew Fulton (IEA), Prof. Andrew Watson (UEA/Royal Society), Bert Metz (ex-IPCC), John Drexhage (IISD) and others. Programme below.

Monday, November 2 nd : Science and scenarios	
• What happened in science of climate change?	Bill Hare (PIK)
• The latest on mitigation scenarios	Detlef van Vuuren (PBL)
Wednesday, November 4 th : Impacts and adaptation	
• New insights on impacts and vulnerability	Saleemul Huq (IIED)
• Adaptation to climate change	Ian Burton
Thursday, November 5 th : Mitigation technologies	
• Energy efficiency	Suzana Kahn Ribeiro (tbc)
• Renewable energy: current status	Tbd
• A view on the transportation sector	Lew Fulton (IEA)
• An update on CO2 capture and storage	Brendan Beck (IEA)
• Geo-engineering: what can we expect?	Prof. Andrew Watson (UEA)
Friday, November 6 th : Mitigation policy	
• Research studies on burden sharing	Tbd
• Finance in the climate regime	Dennis Tirpak (WRI)
• Nationally Appropriate Mitigation Actions	Prof. Joyeeta Gupta (VU)
• Research on MRV	John Drexhage (IISD)
