

Environmental Profiling of Photovoltaics

Services & products

- Life Cycle Inventory & Assessment (ISO-14040)
- Energy PayBack Time calculations
- Carbon Footprinting (CO₂ equivalent emissions)
- Avoided CO₂ emissions
- Direct emissions & abatement
- Environmental profiling of PV companies
- Courses (in co-operation with Solar Academy)

Applications

- Marketing & promotion
- Benchmark (new processes, competing technologies)
- Legislation
- Improved production processes, lower costs
- Improved environmental performances
- Recycling
- Industry annual sustainability report

Customers

- PV industry
 - Feedstock
 - Wafers
 - Solar cells (x-Si & thin-film)
 - PV modules
 - PV systems
 - Equipment manufacturers
- Project developers
- Governmental bodies

Our Expertise - Your Opportunity
