

Services to the PV industry

Competitive service

- On-site cell line optimization
- Full process benchmarking
- In-house industrial scale cell processing
- Advanced cell and module characterization
- Feedstock and wafer quality assessment
- Technology support and consultancy for start-up companies

Technology Transfer

Implementation of:

- ECN Clean, post PSG removal surface modification
- ECN iso-texture, preventing deep etching
- Metal wrap through (MWT), back-contact cell and module technology

Customers

- Cell manufacturing companies
- Module manufacturing companies
- Equipment suppliers
- Material suppliers

Our Expertise - Your Opportunity
